Technical Requirements

There are a few things you'll need to do to ensure your users have access to PerkSpot and are able to receive PerkSpot emails.

Whitelisting

Perkspot uses SendGrid as our email service provider for our welcome emails, weekly perks, and other email communications. Please ensure you have the following whitelisted:

Email Testing

When conducting automated testing (ie. penetration tests or software to verify the validity of links in emails) please be sure to schedule with PerkSpot. We simply need to know the email addresses you will use to run the tests so that we're able to separate that website and email traffic from our normal traffic in order to keep consistent reporting.
